DETAILED ACTION

Allowable Subject Matter

Claims 1-7, 9-23, and 31-40 are allowed, the examiner's reasons for allowance are included in the Office action of 8/20/2007 and the applicant's convincing arguments that were filed 7/30/2007.

The following is an examiner's statement of reasons for allowance:

The prior art fails to teach or disclose a flashlight having an aperture, first and second ends, the device having a first tapered slot on a first side of the housing, a second tapered slot on a second side of the housing, both taper inward in a direction from the first to second end; the light source being located nearer to the first end of the housing, and the slots are received by a base charging unit when the flashlight is inserted into the unit; the device has a switch accessible through the aperture for toggling an electrical circuit for powering the device, wherein there is a resilient cover extending over the electrical switch that provides a waterproof seal for the housing, and an indicator visible through the cover when configured to illuminate when the switch is in the open condition and the flashlight is receiving power from the power source.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
